CACHE PROJECT

Visit Trenton in Dry Farming Belt.

BIG TRACT OF GOOD COUNTRY BEING OPENED.

(Special to The Herald.) charge of T. H. Cutler of the Trenton smiling acknowledgment of the noisy Land & Investment company, which has tribute. its office in the Judge building in Salt Lake, left here this morning for Trenton, where they spent part of the day in looking over and sizing up that section of country, which is believed just now to be on the verge of a boom such as no other place in northern Utah has ever experienced. enced. For a great many years Trenton was the center of Cache county's dry belt district of this section—but the completion of the big West Cache canal has opened up wonderful possibilities for northwestern Cache in general and Trenton, in continuous and the completion of the big west cache canal has opened up wonderful possibilities for northwestern Cache in general and Trenton, in continuous and that the party was never in better shape to make a hard fight. He said he expected Mayor Johnson of Cleveland to support the ticket. ton in particular, and that locality prom-ises to become as productive as the east side of Cache, which is famed as one of

producing section of Utah. Cereal Factory Project.

big cereal factory here, and it was with a view of giving the newspaper men some ing and maintaining such an industry that speak through the middle west.

they were taken over.

It is putting it mildly to say that they were very much surprised at the remarkable change that has taken place and is taking place there; that is, those who were acquainted with the place, and the others were very much impressed with the great possibilities of that section, particularly with regard to the enterprise ticularly with regard to the enterprise mentioned. They found a big country, one that is well drained, and with thousands of acres of the most fertile land lying outdoors. It is bisected by the main line of the Oregon Short Line, and speaking of the railroad calls to mind the evident fact that the company is quite confident as to the future of Trenton, for it has erected there one of the most substantial and commodious stations along its route and commodious stations along its route—one not demanded by the conditions pre-vailing at the time of its erection.

Centre of Dry Farming.

Lying above and to the west of Trenton Lying above and to the west of Trenton are the principal dry land wheat fields of Cache, which annually yield between 300,000 and 400,000 bushels of grain. It is all hard wheat and is in big demand at the cereal factories, notably those of Battle Creek, Mich., scores of carloads having been sent out of Trenton to that city last year and for many years past in fact. The proposition now before the people here is that of establishing a factory to utilize a good portion of this wheat, and Trenton being centrally located, with first-class railroad accommodations, ample power facilities, plenty of help, plenty ple power facilities, plenty of help, plenty of water and an abundance of land, has naturally been selected. Mr. Haddock was very favora ly impressed with claims before going over, but after in-specting the place he did not hesitate to Trenton the finest location in Utah for such an industry. It certainly has advantages no other section of the county can claim—that was the verdict

of all.

The proposed factory is to cost in the neighborhood of \$200,000 and will employ about 100 hands. It will have as its backers the M. & M. association, the United Development association, the business men of Cache county and the Trenton Land & Investment company, which latter Land & Investment company, which latter to assume a large part of the burden in the stage. There were given seats on the stage. There were nine such presents as they entered. Red ribbons were given to those over 50 to 60; blue, 60 to 70, and white to all over 70. There were a large number of white badges.

The pioneers of 1847 were given seats on the stage. There were nine such presents as the stage of the stage of the stage. is to assume a large part of the burden of providing a site for the factory and on the stage. There were nine such present the stage of the stage of the stage of the stage.

of providing a site for the factory and arranging the necessary preliminaries for its installation.

The thing which the visitors marveled at after viewing this fruitful section was that every day the trains carry through it many home-seekers going to Idaho, Oregon and Washington, to districts less fertile and with not one-tenth the advantages that Trenton possesses. They pay nearly or quite as much for their land as they could get the west side land for, too, Trenton's greatest need is advertising. It is the land of opportunity in so far as Utah is concerned. No other section rivals It in the advantages it offers to the home-seeker, the intensive farmer and the cap tallst. The fight Mr. Cutler and his friends are making for the Cutter and his friends are making for the cereal factory is the first notice the other parts of the country have had that Trenton is on the map, but it is not the last, for there is a crowd of boosters in the Flanagan of Reno. thriving little town whose work will bring big results, for they have the goods and know how to display them. The visiting boosters returned to Salt Lake on the afternoon train.

AGGRESSIVE CAMPAIGN

Continued From Page 1.

speeches in all the middle west states, speaking only in the principal centers, and then to carry the fight through West Virginia, Maryland, Delaware, New Jersey and New York state. Much of the time, it was suggested, Mr. Bryan would spend on these trips in onference with the national committeemen and state leaders, and in this States circuit court by the San Pedro, way give valuable aid and direction in Los Angeles & Salt Lake railroad to rethe various campaigns. After a conideration of these tentative suggestions, and an approval of the reports made by the heads of the bureaus, it was decided to call a meeting of the full committee with the various subcommittees Sept. 8 at 10 o'clock in this

Pleased With Progress Made.

Mr. Bryan told the committeemen that he was delighted with the pro s that he had observed, and that e had only a few suggestions to make. he felt that the work could not have leased with the prospect for Demo-ratic success in November.

It was learned tonight that the visit of Mr. Eryan to New York was arranged for not only with the full acence of those now in the direct tion of the Democratic party in that state, but to no small degree to their desire to have Mr. Bryan take an ac-tive part in the New York state cam-paign. Chairman Mack said tonight:

Dates Not Yet Settled.

We talked today on various subects and heard reports from the dif-erent bureaus which were very favorbe better, and approved the plans that we have made for the campaign. No definite dates for Bryan's speaking rips were made. He will confine has peaking to the principal centers in the middle west and doubtful states." the middle west and doubtful states."
Within the next week the dates for Mr. Bryan's speaking tour will probably be fixed by the national committee. A constant stream of callers weet into headquarters today to greet Mr. Bryan, and tonight several local
